| <b>Description</b>             | Flash Voyager Slider X1 32GB USB 3.0 Flash Drive |

## Overview

Flash Voyager Slider X1 is a compact USB 3.0 drive with bold styling and performance to match its looks. It has a smart design, with a USB connector that retracts for protection when you're not using it. A blue activity LED tells you at a glance if it's transferring data.

It's also universally compatible with Windows, Mac OS X and even Linux, with no driver necessary. It supports high-speed USB 3.0 transfers along with full USB 2.0 compatibility, so you can use it with virtually any desktop or notebook.

## Features

| Feature                                                   | Benefit                                                                                                  |
|-----------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
| Convenient, compact size                                  | It's easy to take with you, everywhere you go.                                                           |
| Capless design                                            | The USB connector retracts when you're not using it, and you don't need to worry about misplacing a cap. |
| Blue activity LED                                         | Check whether your drive's busy transferring data at a glance.                                           |
| High-speed USB 3.0 performance with USB 2.0 compatibility | Great performance on the latest systems, and it still works on virtually any system out there.           |
| 5 years warranty                                          | Peace of mind. A statement of Corsair product quality and reliability.                                   |

## Technical Specs

**Unformatted Capacity<sup>1</sup>** : 32GB

**Max Sequential Read (CDM)<sup>2</sup>** : Up to 130MB/s

**Interface Type:** USB 3.0, USB 2.0 compatible

<sup>1</sup>Some of the listed capacity on a flash storage device is used for formatting and other functions and thus is not available for data storage. The actual available capacity for data storage is less than the capacity stated on the products.

<sup>2</sup> Tested with CrystalDiskMark 3.0.3b under Windows 8, USB 3.0 port
