Jabra GN1216

# SIMPLE CONNECTIVITY. MORE FREEDOM OF CHOICE.

The Jabra GN1216 cord is the solution for Avaya one-X® Deskphone 9600 and 1600 series where microphone volume controls are needed. The Jabra GN1216 cord has been designed to offer unique connectivity at an affordable price.

Now your choice of headset is no longer limited by the telephone system. With the Jabra GN1216 cord you are able to connect a range of GN Netcom's most popular professional Jabra headsets dedicated for all-day use in even the toughest environments. And best of all, the Jabra GN1216 cord represents an extremely affordable solution for Avaya one-X® Deskphone 9600 and 1600 series.

Jabra GN1216 features eight microphone volume settings ensuring no Jabra corded headset is too high or too low. Simply connect the Jabra GN1216 cord and Jabra headset from GN Netcom through the Quick Disconnect plug and set the microphone level to your preference.

Jabra GN1216 - straight

Jabra GN1216 - coiled

# FEATURES & BENEFITS

FEATURE	BENEFIT
Simple 8-position slide adjustment	No need for a user manual; simply slide until receiving end can hear you clearly
Standard connector (RJ9)	Connects to all Avaya one-X® Deskphone 9600 and 1600 series telephones using a standard modular plug
Standard Jabra Quick Disconnect plug to headset: - Straight version 80 cm / 31.5 inch cord (SKU 88001-03) - Coiled version up 200 cm / 78.5 inch cord (SKU 88001-04)	Guaranteed to work with all Jabra QD headsets

The new Avaya one-X® Deskphones, at present the 9600 and 1600 series is being introduced across all Avaya phone platforms. The phones have headset ports but they need the Jabra GN1216 when using a corded solution. Wireless products all work well on setting "A" and amplifiers like the Jabra GN8000 and Jabra GN8210 also perform well. The problem with these phones is they have a very special interface which includes an AGC and a sound level protection.

If the headset microphones are slightly too quiet the customer will hardly hear anything and if the microphone is too loud the phone will disconnect the call.  
The Jabra GN1216 solves this and works with all our headsets. It has a setting for each different headset. The cord will only work on the above phones and is not a "universal" solution like the Jabra GN1200. The settings vary depending on headset type.
