

Kodak Capture Pro Software - Auto Import Edition

> Complete control over how and when you capture and process documents

Automatically import existing image files and data from applications, storage systems or databases, and gain the same imaging, indexing and output capabilities as with scanned images

Kodak Capture Pro Software indexing workstation

Index, correct input, and output with time and money savings

- > Maximize productivity by moving indexing downstream from scanning workstations
- > Makes it efficient and affordable to perform all Capture Pro functions other than scanning (indexing, image correction, output)

Kodak Scan Station Pro 550

- > Initiate transactions and feed critical business processes with the push of a button
- > Bring the power of Capture Pro Software to a walk-up capture solution
- > Transform your workflow
- > Automatically extract and feed important data into your business process and immediately send files to a document management system or to secured storage

Kodak Scan Station Pro 550

Kodak

It's time for you **AND** Kodak

Kodak
Capture Pro Software

Your extreme makeover
for document capture
and management

A complete portfolio to transform
your productivity style

GO PRO

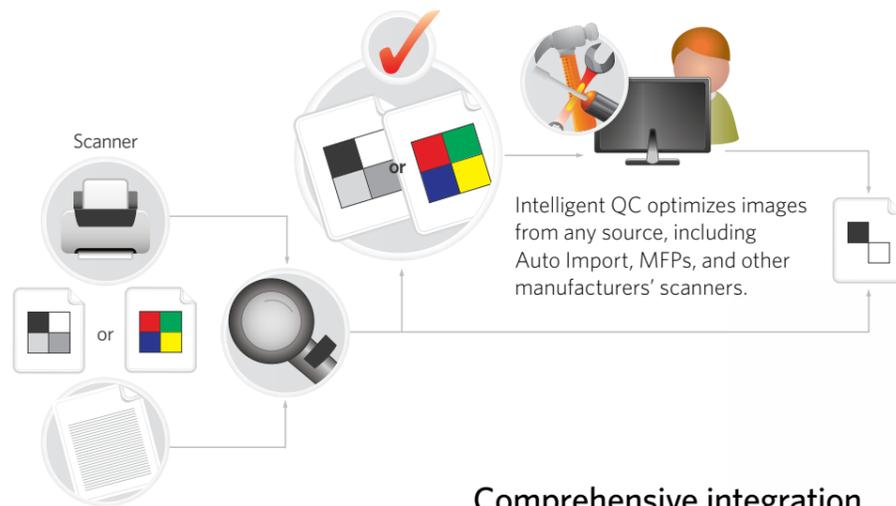

Make your business beautifully dynamic

It's the complete capture software application that allows you to scan, process, utilize, and manage documents and important data from those documents. Get powerful, flexible batch capture with **Kodak Scanners** – and scanners from other popular manufacturers – in desktop to high-volume production environments.

Kodak Capture Pro Software lets you quickly convert forms, invoices, patient records and other critical business documents to high-quality images.

Intelligent Quality Control (QC): when accuracy and readability matter

- > Adjusts image quality even when original document is unavailable for improved data capture accuracy

Efficiently capture critical index data, then automatically deliver it all to databases and applications.

Benefit from new advances in quality control to identify and adjust challenging images without rescanning, enhanced integration with **Microsoft SharePoint**, and more practical innovations.

- > Reduces cost of error correction through better downstream recognition
- > Cuts image review time by intelligently selecting questionable images

See images before and after correction for streamlined quality control.

Comprehensive integration with **Microsoft SharePoint** and other ECM systems

Imports index configurations from **SharePoint** from a wide array of column

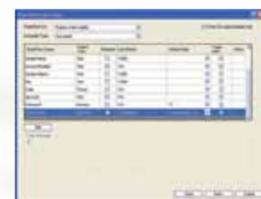

types. Easily standardize configurations across multiple users to eliminate concerns about processing or capturing the right data to feed a process.

Select output for **SharePoint** 2007 or 2010.

Choose **SharePoint** destination.

Create index fields from **SharePoint** columns.

An array of stylish, powerful advantages

Including –

- > Save training costs with one familiar interface for all your scanners while avoiding complications and inconsistencies via shared settings for multiple users
- > Cut costs for manual data entry during indexing by using Database Lookup to validate or populate fields from Open Database Connectivity (ODBC) sources
- > Leverage your existing ECM Systems and databases through simplified integration capabilities
- > Easily customize for specific job and user management requirements with individual APIs
- > Keep costs low and predictable with no per-click or volume charges
- > Output popular file formats to file, system, e-mail and print, simultaneously
- > Support for **Microsoft Windows 7, XP and Vista** Operating Systems

Kodak Capture Pro Software Network Edition delivers the total document capture experience

Kodak Capture Pro Server Software – featuring remote administration, batch monitoring and centralized licensing

Kodak Capture Pro Client Software – for smart workflow, robust processing, management and server connectivity

Kodak Capture Pro Software Output Server Module – for continuous job processing on any station while remote batch output is handled at another location

Achieve greater process consistency, speed and data integrity – centrally manage multiple capture and indexing stations anywhere

Gain enhanced insight – in to statuses, throughput and performance-based measurements

Quickly resolve bottlenecks – on local workstations to greatly increase the speed of job processing and output

Flexible workflow with **Capture Pro Network Edition**

Mix license types, link workstations, utilize auto import and do more, more easily.
