Product Description/Positioning

Lexmark's non-clogging colour print cartridges make a vivid and long lasting impression by delivering extraordinary hues for most vibrant output.

Customer benefits

- **A new cartridge, a new print head Like a brand new printer!**

All Lexmark inkjet cartridges have the actual print head, there where the core inkjet technology lies, integrated to the cartridge bottle.

The main advantage to having the print head as an integrated part to the cartridge is that Lexmark customers get a new print head with each cartridge replacement! This is each time like getting a brand new printer all over again! No risk of deterioration of the print head (and therefore a decrease in quality) during the life of the printer as can be the case with other manufacturers who integrate the print head as a fixed part inside the printer itself.

- **Dye-based Ink for Lexmark Color Jetprinter 2070**

The Lexmark colour ink for the Color Jetprinter 2070 provides bright and sharp colours on any media type.

Product Specifications

Resolution up to 600x300 dpi

Nozzles 96 nozzles

Ink Chemistry dye-based

Drop Size 69 picoliter

Average Yield 200 pages @ 15% coverage in Normal mode

UPC Code 7-34646-10710-5

Product Compatibility
