

## Zebra Card Printers Supplies List P330i/P430i with UHF Gen 2 RFID Encoder

### Genuine Zebra® Supplies

Your choice of card printer supplies is critical - the quality of cards, ribbons and other items affects the reliability of your printer, the consistency and the overall quality of the printed images. To maximize your printer's performance, always use genuine Zebra supplies for your card printer application.

### UHF GEN 2 RFID PLASTIC CARDS

Zebra UHF Gen 2 RFID cards are designed to be utilized across the entire worldwide EPC UHF operational band (850 to 950 MHz), providing full read/write capabilities. The card inlay offers superior RF range performance in a typical card use environment. The card antenna is designed to greatly improve RF range when the card is physically held in the hand or close to the body.

The UHF inlay placement allows compatibility with a variety of standard options such as magnetic strip, serialized barcode and pre-printed cards.

## OVERLAY & LAMINATE RIBBONS

True Colours® protective materials such as varnish overlays are designed to be applied to further protect printed cards. Shielding printed images from UV light (fading of image), preventing dye-migration, reducing normal wear to the card image caused by frequent swiping of card through magnetic stripe readers, and deter fraudulent card reproduction.
